

# Hygiene - Activities Guide

## 1. Does the student know what the hygienic items are?

- Collect hygienic objects from within your house (deodorant, soap, toothbrush etc) and ask them to match these to the visuals.

## 2. Can student match the hygienic practices to the parts of the body.

- Ask the student to match the visuals to the parts of the body that they correlate with.
- Next, practice using the objects with them (model what using these look like)
